Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 October 2008.

DETAILED ACTION

1. Applicant's election of Group I, claims 71 and 72 (and linking claims 69 and 70), in the reply filed on October 10, 2008 is acknowledged. Applicant did not indicate whether the election was made with or without traverse. Because applicant did not distinctly and specifically point out any supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 69-72 are pending and under examination.

Claims Summary

2. The claims are drawn to a method for enhancing an immune response in an animal by administering a viral envelope, specifically a viral envelope of hemagglutinating virus of Japan (HJV). The immune response is antitumor immunity.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 69-72 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaneda (EP 1170363 A1, filed in IDS of 12/20/06). The claims are summarized above. Kaneda discloses virus envelope vectors for gene transfer, comprised of inactivated HJV particles (see abstract and paragraphs [0011-0012]). Kaneda discloses that the vector is capable of gene transfer into a

broad range of in vivo tissue, including cancer tissue (see paragraph [0012]). Although Kaneda does not teach that the vectors are effective for enhancing an immune response or for inducing an antitumor response, the structural limitations of the claims are met by Kaneda's HVJ viral vector because it comprises viral envelope protein. Therefore, any functional properties of the instant vector are expected to be present in Kaneda's vector, thus the method is expected to accomplish the same purpose for enhancing an immune response.

Conclusion

4. No claim is allowed.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
